

# SECTION 3

## AIRPORT OPERATIONS AREA

### 3.1 AUTHORIZED ACCESS (rev.4/2024)

Only those vehicles necessary for airport operations and support are authorized access to the Airport Operations Area (AOA). Authorized vehicles shall display either a temporary ramp permit or an Airport registration decal and the driver shall have the proper badge endorsement.

To receive a ramp driver's endorsement, it must be requested on the badge application, have an operational need to drive ground vehicles on the AOA, and the individual must successfully complete the non-movement area interactive employee training (IET). Hands on training should also be accomplished tailored to the employee's duties. Individuals must have a valid driver's license to be issued a ramp driver's endorsement. If an employee's driver's license is suspended or revoked, the badge must be surrendered to the Badging Office immediately. A new badge without a ramp driver's endorsement may be requested by your employer.
